# Lift Modernization

mp moving people

We are a lift and escalator company which offers solutions for moving people and loads within buildings and other urban spaces.

We contribute towards improving people's quality of life and wellbeing.

As an organization, we follow our principles and values and apply them throughout our area of work:

- ✓ Closeness.
- ✓ Integrity.
- ✓ Security.
- ✓ Innovation.
- ✓ Excellence.

We remove barriers and meet mobility needs in buildings.

- ✓ International family business.
- ✓ Based in Seville (Spain).
- ✓ With 25 years of history.
- ✓ With business links in more than 100 countries on 5 continents.
- ✓ More than 120,000 lifts installed.
- ✓ More than 10 million users/day.

**We always adapt to requirements and offer customized maintenance and modernization solutions**

## Service based on closeness

- ✓ SECURITY
- ✓ FLEXIBILITY
- ✓ AGILITY IN SOLUTIONS
- ✓ EFFICIENT DELIVERY

We enjoy working, providing our clients with a service based on CLOSNESS, and offering them a wide range of RELIABLE products.

## Sense in renovation

We adjust your lift to the effects of wear and tear as a result of use, and to regulatory and technical changes so that its service life is extended and its operation improved.

MP modernization experts provide their experience and knowledge so that your lift is renovated efficiently, inexpensively, and in a way that is comfortable for users.

We know how to adapt to your needs and we offer customized modernization solutions.

## Why modernize?

### SAFETY

To minimise potential risks and adapt your lift or escalator to meet new regulations.

### ENERGY EFFICIENCY

To reduce energy consumption.

### ACCESSIBILITY

To increase car dimensions, or make it more accessible for users.

### COMFORT

To improve the quality of journeys, the approach to the landing, the stopping accuracy, and vibroacoustic conditions.

### APPEARANCE

To renovate the appearance of your escalator, or the aesthetics of the car in your lift, its doors, or its signage.

### RELIABILITY

To reduce the number of breakdowns and increase the time for which your lift is available.

## Eco-efficient Lifts

When the existing lift technology it is falling behind and the reparations are expensive, MP Lifts has a maneuver replacement KITS, that respect, as much as possible, the existing components, avoiding civil works and resulting an economic alternative to buying spare parts.

We design lifts to counteract the use of wear and tear to extend the lift life and improve its function, according to technology changes and normative classification VDI, certificación BREEAM y LEED.

MP modernization experts of lifts offer their experience and knowledge so that your elevator will update, economically, to the latest technological advances.

The modernizations are planned with the criterion of reducing inconvenience for the user.

Our solutions always include intelligent functions that minimize the energy consumption and the environmental impact. We offer LCE analysis, VDI classification, BREEAM certification and LEED.
